International Conference

Combined Transport of Goods, Award Ceremony of Transport Prize H.C.T.A «Dimitrios Tsamboulas» 2019 & Rail Cargo Challenge Rotterdam - Game

Organized by the Hellenic Chambers Transport Association (H.C.T.A), in cooperation and with the support of the Delft University of Technology (TU Delft) Netherlands, the Union of Hellenic Chambers of Commerce and Industries (KEEE), the National Technical University of Athens (NTUA), other Greek Universities and the Hellenic Federation of Road Transport (OFAE), under the auspices of the Ministry of Infrastructure and Transport as well as of the Ministry of Maritime Affairs and Insular Policy and is hosted by o.mind Creatives Chain & Logistics magazine, under the 7th Fair "Supply Chain & Logistics - Cargo Truck & Van Expo 2019".

Distinguished Greek and foreign experts attending the Conference are expected to present the European experiences and best practices in the development of combined and intermodal transport of goods, on the Freight Villages/Logistic Centres, the current status of their implementation in our country and describe how a central transport policy encouraging their development can be “build” at national level. .

During the event, the Award Ceremony of the Transport Prize H.C.T.A «Dimitrios Tsamboulas» 2019 will take place, followed, from 17.00 to 20.00 hours, by the Rail Cargo Challenge Rotterdam – Game, that the conference participants, fair exhibitors and visitors will be invited to play. A game that is about the application of Synchromodality, that will be played with the support and under the supervision of Mr. Lóri Tavasszy, Professor of Freight and Logistics at Delft University of Technology (TU Delft) and Dr. Ioanna Kourouniotis, Transport Technology, Policy and Administration, TU Delft. A preliminary programme of the event is attached. For the detailed programme

Award Ceremony of Transport Prize H.C.T.A «Dimitrios Tsamboulas» 2019

3rd Annual Panhellenic Award on the subject of :

«Prospect of developing combined intermodal national and international freight transport
In Greece – Obstacles, challenges, suggestions»

The annual Transport Award H.C.T.A "Dimitrios Tsamboulas" was established in 2016 by the Hellenic Chambers of Transport Association in memory of the deceased professor of NTUA and close collaborator of the H.C.T.A and the Greek Chambers, Dimitrios Tsamboulas, for his multiannual work and contribution to Greek transport. It is addressed to students and young graduates of Greek universities that have faculties, departments, sectors or direction/deepening studies in transport and shipping. The prize is awarded to the best work carried out by a student or new graduate, or a group of students or new graduates of the aforementioned universities.

The three first prizes for the best submitted works are **monetary χρηματικά (Α' 1500 Euros, Β' 1000 Euros και Γ' 500 Euros)**. For the year 2019 sponsor of the prizes is the Hellenic Federation of Road Transport (OFAE).

in the context of their work the contestants should analyse the current situation and the strengths and challenges, identify the main obstacles to the further development of national and international combined freight transport in Greece and present proposals for their development with corresponding scenarios for assessing the freight traffic that will be served.

The competitions follows two (2) phases of submission and corresponding evaluations.

Phase A: Submission of application and draft work plan - Default of best proposals (short list). **Phase B:** Submission of the work.

The work is evaluated by a special evaluation committee, consisting of a small number of representatives of members invited by the H.C.T.A, originating from higher education institutions (universities), the Ministry of Infrastructure and Transport and others from the H.C.T.A and the Union of Hellenic CCIs. Representatives of educational institutions are not able to rate the work submitted by students, or groups of students, from the educational institution that they come from.

Rail Cargo Challenge Rotterdam – Game Athens Metropolitan Expo

Saturday, 9 November 2019, 17.30 - 20.00

Moderators:

Κος Lori Tavasszy, Professor in Freight and Logistics at the Delft University of Technology (TU Delft) και Dr. Ioanna Kourounioti, Transport Technology, Policy and Administration, TU Delft

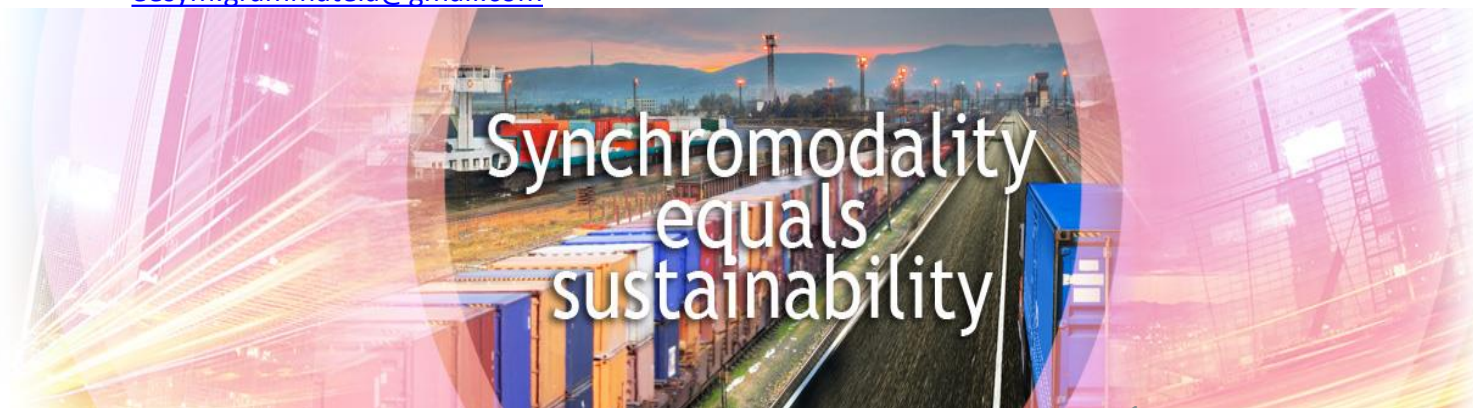

The Game is an application of Synchromodality that is used as a tool for decarbonization and optimization of transport and logistics.

SYNCHROMODALITY is defined as an “evolution of inter- and co-modal transport concepts, where stakeholders of the transport chain actively interact within a cooperative network to flexibly plan transport processes and to be able to switch in real-time between transport modes tailored to available resources

Free entrance – Parking – Transfer from Athens Airport oposit Sofitel
